

WEB based Visitor system for TGM*

Do you want to increase the security regarding visitors?

Do you want to control and manage people visiting your premises?
- Who, when and how many are schedule to arrive tomorrow?

Do you want to know whether the employees have arrived and where they stay?

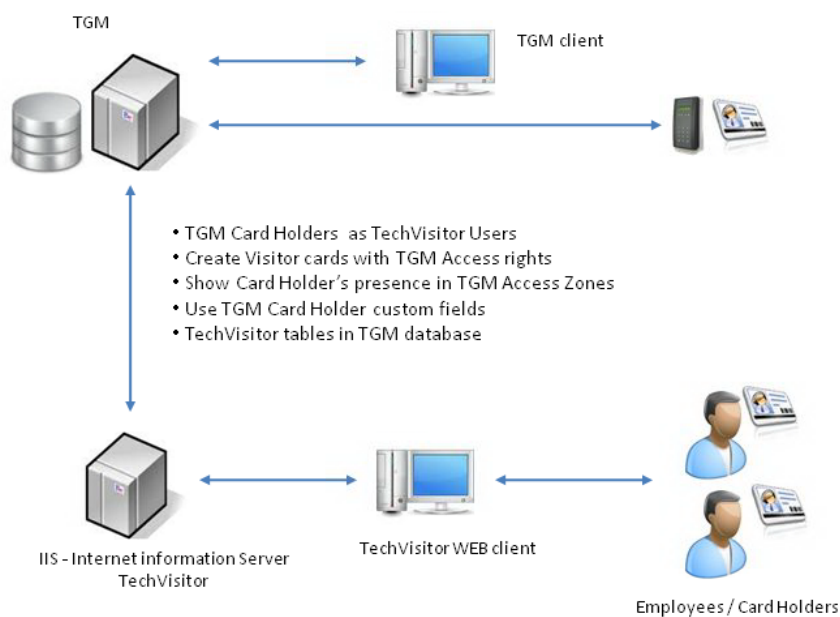

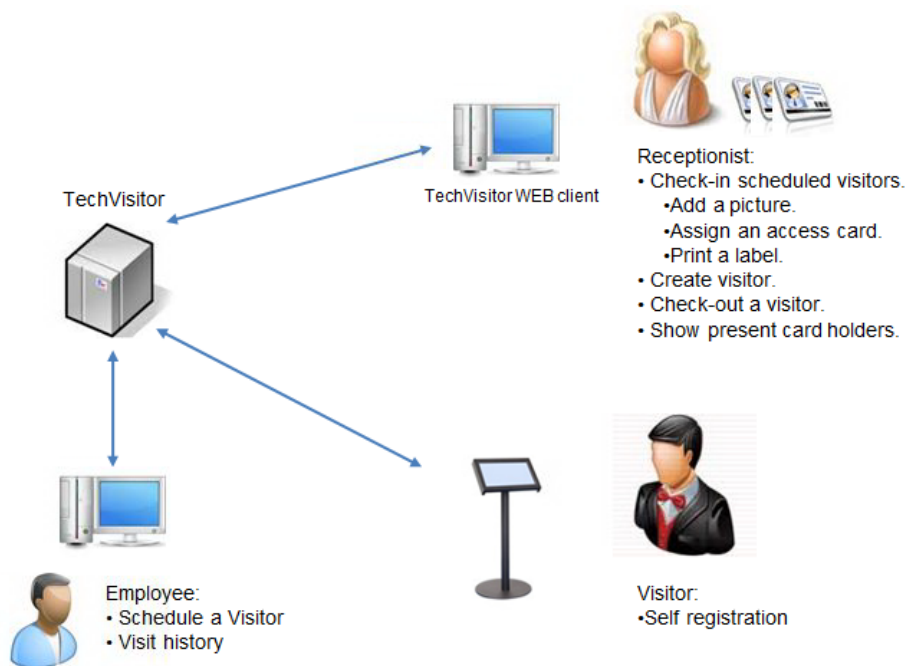

Do you want to optimize the work in the reception area, so that the receptionist has more time to welcome your guests?

....then **TechVisitor** could well be your answer!

- TechVisitor is fully integrated with your Access system and TGM*.
 - Visitor cards are managed from TechVisitor and automatically created in your access system.
- TechVisitor shows present employees and in which zone they stay. The receptionist is notified if checking-in visitors to employee are not present.
- TechVisitor User Roles: Admin, Reception, User (employee), Guest.
- Reception domains: TechVisitor manages various receptions in same organization/company.
- All employees are users at TechVisitor and are able to
 - Create and schedule new visitors.
 - Have private list of visitors.

TechVisitor users can be imported from TGM*.

*TGM referring to ThorGuard Management

TechSolutions creates value-adding integrated solutions for the security business systems and is a solutions partner for systems integrators to create network-based surveillance and alarm management solutions that are interoperable with different systems and devices.
